## Outside Skirt

The outside skirt steak offers the intense flavor of hanger steak and texture of flank steak. Marinades enhance its flavor, and its distinctive qualities make it unique and memorable.

## About Outside Skirt Steak

This cut comes from the plate primal, which generally provides cuts with higher fat content. Its shape is more uniform and rectangular than the inside skirt steak. Outside skirt steak is delicious when marinated and seared over high heat, or when grilled, pan-fried or broiled.

### Attributes

- Robust, beefy flavor
- Lean with moderate marbling
- Great with marinades
- Thin, although thicker than inside skirt cut

## Think Beyond Fajitas

Outside skirt steak easily absorbs intense flavors from marinades, salsas and chimichurri. Popular in fajitas, it can also be sliced for tacos and sliders and served with your signature salsa. Braise it for traditional Cuban ropa vieja or beef stews, or marinate it, then slide it on skewers with fresh fruit or vegetables and grill for kebabs.
