FRESH MEATS TEAM

Trimmed to Perfection St. Louis Ribs

With their rich pork flavor, St. Louis ribs are a favorite at American-themed restaurants and barbecue competitions. However, they can be a highly versatile protein with the addition of internationally influenced rubs and sauces. They also can provide a great profit margin with their initial low cost.

About St. Louis Ribs

St. Louis ribs come from the belly primal and are cut from spareribs. Their ample marbling and tougher texture make them ideal for slower cooking methods such as grilling, smoking, braising and roasting. With their rectangular shape and flatness, St. Louis ribs cook evenly and brown easily.

Attributes

- Flavorful and meaty
- Ideal for low and slow cooking methods
- Well marbled
- Excellent plate presentation

So Much More Than Barbecue

Closely trimmed of fat, St. Louis ribs can add fragrance and intense flavor to Asian and Indian dishes such as soups, noodle bowls and stir-fries. They can become a delicious appetizer when cut individually and served with a variety of dipping sauces. With the bones removed, the rib meat makes a savory filling for a bánh mì sandwich.

Chairman's Reserve® Prime and Premium Pork

Two-tier pork offering with cuts hand selected for optimal marbling, color and pH. Prime tier meets the exacting specifications for the Master Chefs' Institute Seal of Excellence.
